

I bought an XM Sattelite Radio, specifically because of the horrible programming choices afforded me after you decided to allow radio stations to consolidate under the same ownership. That consolidation allowed for stations to make awful programming choices. I can find the NY Yankees on three local stations, however since I am not a Yankees fan, every evening is filled with games I don't want to hear. Basically, you moves here limited my choices.

I was forced to purchase choices that are more acceptable in terms of the programming I want to hear. Now the same radio stations that took away my free choices are after the programming I pay for. I say it must stop. XM and Sirrius should be allowed to send out programming their customers want.
